Software Development: HTML, CSS, Javascript, React, Redux, Next Js, Express, Node.js, Bootstrap, Java, Spring Boot
Databases: Firebase, MongoDB, MySQL
Cloud Services: Google Cloud Platform, Amazon Web Services, Github**,** NetSuite

RELEVANT EXPERIENCE

Full Stack Software Engineer   **Ai United Insurance** | Houston, Texas | May 2023 - Present
- Designed, and developed multiple front end web applications using React and Next Js from new hire training portals to customer facing websites
- Created a secure backend REST APIs using Node Js to connect with front end applications and other APIs including many google cloud services
- Implemented continuous integration and deployment (CI/CD) pipelines to efficiently delivery code to cpanel and google cloud platform
- Delivered cutting-edge solutions that positively impacted OSIX's digital presence and business necessities.

Data Analyst   **Optimal Health Solutions**| Houston, Texas | August 2021 - August 2022
- Responsible for ensuring the accuracy and integrity of the company's data using MySQL
- Used Python to develop and customize scripts and applications, which allowed me to complete daily tasks more efficiently and quickly
- Played a key role in gathering user requirements and building user tools and codes to automate work processes.
- Leveraged my expertise in PANDAS and Python to significantly improve the efficiency and effectiveness of our data management processes.

Ecommerce Developer   **Freelance** | Houston, Texas | January 2021 - August 2021
- Developed and maintained custom e-commerce websites for a variety of clients using Shopify
- Worked closely with clients to understand their unique business needs and goals, and designed and implemented custom solutions to help them grow their online sales
- Utilized my expertise in HTML, CSS, JavaScript, and PHP to create intuitive and user-friendly e-commerce platforms

Programming Projects

CK Trips Travel Planner   [View Project](#)
- A prototype travel planning web application that allows users to plan all aspects of their trip, including dates, destinations, hotels, flights, and vehicle rentals in one location.
- Implemented the front-end user interface using React and Redux, and utilized Next JS for server-side rendering and optimization. I also developed an admin panel that allows authenticated users to add new travel options

Every Day Counts   [View Project](#)
- A productivity-focused web application that allows authenticated users to track their daily tasks and deep work sessions, and receive objective feedback on their statistics.
- I implemented the front-end user interface using React and Redux, and used google firebase as a backend system to store user and task data. I also developed features such as real-time task tracking and statistical analysis to provide users with insights into their productivity habits.
